

Jewel, a stunning and sensitive Appendix mare who is now happily at home with her new owner on the Sunshine coast, is really fitting in and totally enjoying her new life;

We love Jewel and she is definitely "my" horse! She and I have bonded and I love her sassy "horsonality"! Comes from her intelligence - she has a very keen mind and loves to keep it active, (unless it is a sunny mid-morning or sunny mid-afternoon when lazing in the sunshine is soo necessary for this princess :)

Jewel makes me  
laugh every day and I  
know we share this  
because I see the  
twinkle of delight in  
her eye too.

Jewel in the  
middle on a  
sunny day

She is wonderful on trails - as long as her tender thoroughbred feet are booted - and she takes riding quite seriously! When she is saddled she goes into partnership mode and says, "OK, let's do this!" How awesome is that!

And this is so satisfying as our start together was, well, not easy! She can still get very pushy in the open sand ring with the two other horses but now allows me to move her around in that space - which is a HUGE improvement from her rearing and kicking at me in our first few experiences there! Jewel has taught me so much about myself in such a short time.

Jewel and Strider grazing at liberty

"Sometimes I take my Herdmates to the Neighbour's place to cut their grass!"

And she has been working with me as a co-therapist in my Equine Facilitated Wellness business here at Listening Horse Ranch and has been a wonderful teacher for others.

Jewel dozing with her Posse around her

She really lives up to her name "Precious Jewel" and I want to thank Circle F for caring for her in her transition period, for your help with the early days, and for all the love and education Emmaline gave her before she came to you and me.

Thank you and blessings to you and all the people and horses at Circle F.

Terri
